

XiTrust Secure Technologies, one of Europe's leading providers of electronic signatures and digital identity, is a new member of PARIS Innovation Lab

PARIS AG and XiTrust Secure Technologies GmbH announce strategic partnership

Berlin/Graz, June 12th, 2017 – PARIS Innovation Lab, the network for technology providers, digital transformation, and process optimization, has a new partner – XiTrust Secure Technologies. With its products, the IT company from Graz covers the entire range of digital signature applications, and provides various services in the field of digital identity. By joining forces, the new partners aim to strengthen their individual positions in the European market and develop complementary solutions for digital transformation.

XiTrust supports its customers with easy-to-integrate solution packages for digital signatures, digital identity, and email security. PARIS supplements the portfolio with solutions for the optimization and automation of complex business processes as well as for digital knowledge transfer using artificial intelligence. The strategic partnership focuses on the development of additional innovative products to increase the security of digital processes.

"Since an increasing number of companies are encountering digitization and discovering the resulting advantages with respect to process costs, we see a growing need for systematic support of the change process," says Andreas Koller, Head of Business Development at XiTrust. "In close collaboration with PARIS, we will soon be offering new smart solutions."

Sebastian Grodzietzki, CGO at PARIS AG, adds: "The solutions from both partners can be easily integrated into existing IT systems to achieve precisely targeted digitized improvements. The combination is ideal – for applications in change management and performance support such as context-sensitive guidance and process control or the automation of process steps, employees no longer face unresolved issues at critical times because explanatory support is already in place. The transformation of processes and applications is simplified and the advantages for companies are immediately apparent."

PARIS AG and XiTrust Secure Technologies GmbH announce strategic partnership

Brief profile of PARIS AG:

Robotics Intelligence Systems – provides leading technologies for process navigation and optimisation, automation, documentation and e-learning. The solutions from PARIS AG and its datango division support customers by providing targeted process guidance, staff training, faster rollouts and smooth operation of enterprise applications. The solutions feature a context-sensitive navigation aid at the point of need and facilitate automatic generation of documentation, training materials, software simulations and e-learning environments in the live system. As a result, PARIS enables businesses to reduce input errors and support costs, while increasing user acceptance. Features supported by the datango performance suite are an integral component of business processes and applications in companies of varying sizes in a range of different sectors.

Brief profile of XiTrust GmbH:

Since 2002, XiTrust Secure Technologies products have supported companies from all sectors. From its three locations in Austria and Germany, XiTrust works with customers to pursue the vision of a paperless future. All products for the more than 100 customers from industry, trade, and the public sector can be custom integrated into existing IT landscapes based on standard solutions. The results are seamless business processes with no media breaks and noticeably more individual freedom for those who integrate signed documents into company systems on a daily basis. XiTrust Secure Technologies today covers the entire range of applications for electronic signatures.

- Digital identities with the XiDentity.eu service
- Digital signature folder with XiTrust MOXIS
- Electronic signatures with the XiTrust business server (XBS)
- Secure email communication with the XiTrust mailing system (XMS)
